IVAC Project Fokus Balkan Online

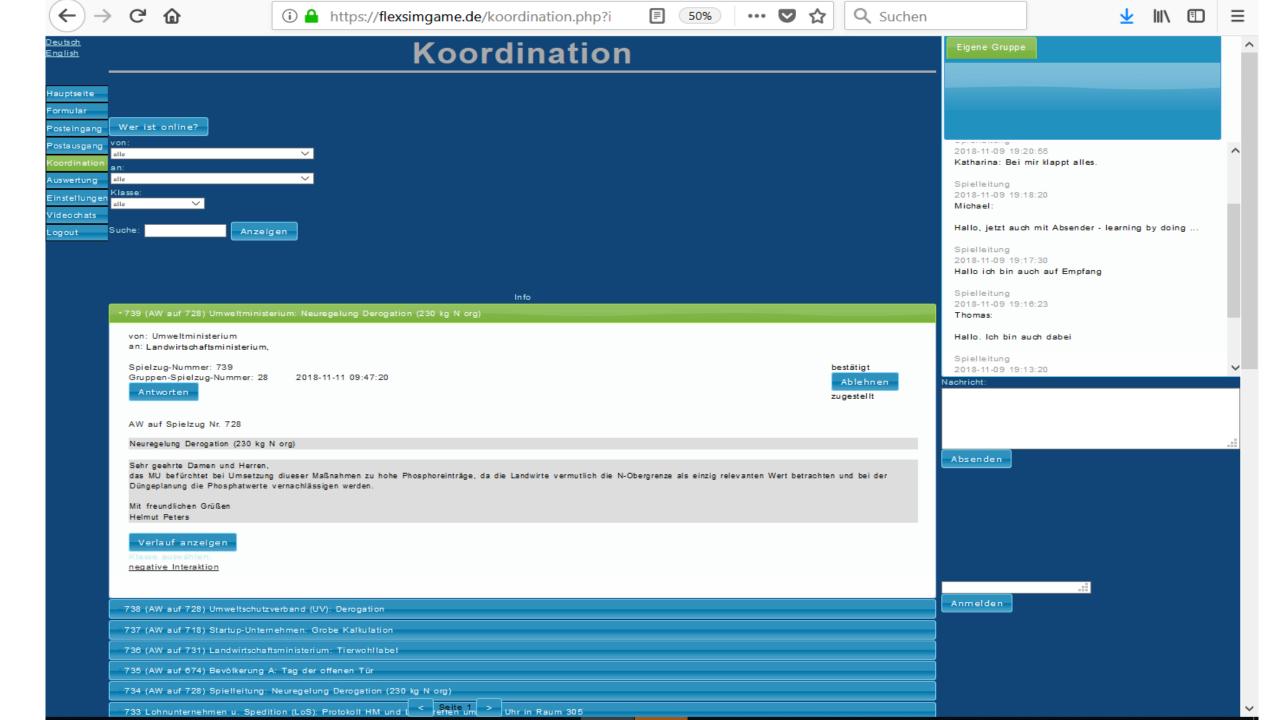

Table of Content

- 1. History of Flexsimgame
- 2. Why using Flexsimgame for our project?
- 3. What can Flexsimgame do?
- 4. Showing the Platform
- 5. Questions
- 6. Discussion

History of Flexsimgame

- Developed and administered: Dimas Wiese & Gerlinde Wiese
- Developed for a project about simulation games in the field agriculture at the University of Göttingen 2015-2018
- First trials with agriculture students at the university of Göttingen 2016-2018
- First field trials in rural areas in Germany with blended simulation games about the implementation of the new fertilizer application ordinance 2018
- Extended and redesigned for the Fokus Balkan Online IVAC Project in 2020/21

Why using Flexsimgame for our project?

Practical reasons:

- It is free of charge
- It uses not much data
- It works on most browsers
- It do not need an email address of participants

Usability reasons:

- It is easy to set up a digital simulation game by oneself
- It is acceptable to manage a simulation game by oneself
- It can facilitate long asynchronous simulation games
- \rightarrow It is a basic but very functional tool

What can Flexsimgame do?

- Until now up to 100 roles can be implemented for a game
- Up- and Download of materials in public and personal files
- Personal message systems
- Chat groups can be created by the game host
- Shared notes are possible
- Logos can be implemented
- Web shops are possible
- Video chat is possible

Let's take a look into Flexsimgame

Questions?

Discussion: Possible further use for Flexsimgame in higher education?
